Education

Kalinga Institute of Industrial Technology (KIIT)

B.Tech in Computer Science and Engineering (CGPA: 7.52)

Bhubaneswar, India

Expected May 2027

Experience

Steel Authority of India Limited (SAIL), R&D Centre for Iron & Steel

Jun 2026

Summer Trainee – Warehouse Stock Inventory Management System

Ranchi, India

- Built a full-stack inventory platform for products, suppliers, warehouses, orders and invoices, addressing the need for centralized stock and order management.
- Challenge: coordinating role-specific workflows and database operations; solution: implemented REST API routes with Next.js, TypeScript, Prisma and MongoDB.
- Impact: improved visibility of inventory and business data through role-based admin, client and supplier workflows and dashboard views.

CCL

May 2024 – Jun 2024

Web Development Intern

India

- Developed and refined web interfaces using HTML, CSS and JavaScript to support responsive user-facing pages.
- Challenge: maintaining consistent layouts across screen sizes; solution: applied responsive UI structure and reusable styling patterns.
- Impact: supported the delivery of functional, responsive web pages for the assigned application requirements.

Projects

Stockly – Inventory & Order Management Platform | Next.js, TypeScript, Prisma, MongoDB

- Problem solved: centralized product, stock, supplier, warehouse, order and invoice workflows in one role-based platform.
- Challenge: coordinating application state and database operations across multiple workflows; solution: used Next.js API routes, Prisma/MongoDB and TanStack Query for structured data access and state management.
- Impact: provided separate admin, client and supplier workflows with dashboards, authentication and integrated payment/shipping capabilities.

ICARDS – Cardiac Risk Prediction Platform | Python, TensorFlow, Scikit-learn

- Problem solved: provided a software-based approach for estimating cardiac risk from structured input data using trained prediction models.
- Challenge: preparing input features for reliable model use; solution: applied data preprocessing and used Scikit-learn/TensorFlow for model development and evaluation.
- Impact: converted structured user inputs into model-based risk predictions through a Python application workflow.

Portfolio Website | Next.js, React, Tailwind CSS, Sentry

- Problem solved: created a responsive platform to present projects, skills and professional information in a structured web interface.
- Challenge: maintaining a consistent and maintainable frontend; solution: built reusable React components with Next.js and Tailwind CSS.
- Impact: improved portfolio presentation and reliability through responsive UI and Sentry-based application error monitoring.

Technical Skills

Languages: C, C++, Java, Python, JavaScript, TypeScript, SQL

Web / Backend: HTML, CSS, React, Next.js, Tailwind CSS, Express.js, REST APIs

Databases: MySQL, MongoDB, Prisma ORM

AI / Data: Python, TensorFlow, Scikit-learn, data preprocessing, model evaluation, OpenRouter API

Tools / Cloud: Git, GitHub, Docker, AWS fundamentals

Certifications

[Deloitte – Data Analyst](#)

[SAP – ABAP Developer](#)
